## Inertial Nav Solutions for the Commercial Airline Industry

Navhouse understands that turnaround time (TAT), cost and reliability drive the inertial nav needs of our commercial airline customers. That's why Navhouse sets the industry benchmark for INU repair & overhaul performance.

### Your Total INU Solution

Navhouse provides recertification and repair and overhaul of Inertial Navigation Units and subassemblies for commercial aircraft. Our full service capabilities and large rotatable stock provide you with a single source for all your INU needs from level II to IV repair services:

#### Level II INU, MSU & CDU Repair and Overhaul

- Calibration
- Test and evaluation to system level
- ATP
- System certification
- System runs/tuning for higher accuracy

#### Level III Inertial Platform Repair and Overhaul

- Calibration
- Test and evaluation

#### Level IV Gyro, Accelerometer & Circuit Card Repair and Overhaul

- Instrument repair and overhaul
- Reassembly
- Calibration
- Test and evaluation
- Refurbishment

## Commercial INU & Instrument Repair Capabilities

Navhouse supports INU and instrument repair on a full range of Litton and Delco INUs for commercial aircraft including:

- LTN 92
- LTN 72
- LTN 51
- CIV (Carousel IV)

## Quality You Can Depend On

An ISO 9001:2000 and SAE AS9100B facility, Navhouse provides our customers the most stringent levels of quality assurance for inertial repair and overhaul. Our systems integrity is maintained to OEM specifications and standards with universal test equipment. Navhouse's Class 1,000 clean room ensures the highest standard of instrument repair and overhaul.

## Large Rotables Inventory

Whether it's a lease, core exchange or direct sale of units and subassemblies, our large inventory of INU and subassembly rotatables helps ensure our commercial airline customers keep on time.
